Mr. Boyce Adams, Sr.
BankTEL Systems, Inc

Title: Chief Executive Officer / Co-founder

Education: B.S., Marketing, MSU

Residence: Columbus, Mississippi

Summary Biography:

Boyce Adams, Sr. co-founded BankTEL Systems in 1992 with only an idea and a conviction to develop software that uses automation to increase efficiencies and reduce costs for financial institutions. Now celebrating their 22nd year, BankTEL has grown to over 1,400 financial institutions in all 50 states, as well as in the Caribbean and several foreign countries.

Before BankTEL, Boyce worked in the oil industry developing software to improve operations from the field to the front office. It was there he saw the importance of automation with the emerging development of the early PC systems.

He later worked as a consultant to a CPA firm where he brought the same keen vision to the accounting profession during a time when technological advances were changing the way financial institutions do business. Boyce recognized the need for software solutions that not only interfaced with core banking systems but could work simultaneously on different platforms to more fully automate financial accounting. From there, BankTEL was born.

Under Boyce’s leadership, BankTEL has become a leading supplier of auxiliary financial software products that are reliable, innovative and backed by exceptional customer service and support. Boyce has continued to be involved in the design, testing and implementation of BankTEL’s products and still insists on doing an installation and training session from time to time, to get his hands on the product in a live environment.
